-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-3 are rejected as failing to define the invention in the manner required by 35 U.S.C. 112, second paragraph.

The claim(s) are narrative in form and replete with indefinite and functional or operational language. The structure which goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a manner as to present a complete operative device. The claim(s) must be in one sentence form only. Any dependant claims should set forth similar preambles to the base claim(s).

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. As best understood, claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Monahan ("Re: GPS recommendations for travel in Europe?").

Monahan teaches the need to rent a portable (GPS) device while traveling abroad. The

Art Unit: 3622

need to provide maps, local information, etc is set forth. Official Notice is taken that it is well known for a rental agency to collect and store user identity information when renting equipment. It would have been obvious to one of ordinary skill at the time of the invention to have collected the required identification using any such identification, such as a passport. It would have been obvious to one of ordinary skill at the time of the invention to have stored the details of the rental contract including user identity information on the companies Internet-connected server so that it can be accessed from anywhere if needed. Simply collecting and storing the user's name is taken to meet the "passport information" limitation. Official Notice is taken that it is well known to keep records of existing customers so that future business with that customer can be conducted without the need to collect all of the customer information again. It would have been obvious to one of ordinary skill at the time of the invention to have kept such customer account information for future rentals. Regarding claim 3, any internet connected device (as are well known) would be capable of retrieving the user account information. It would have been obvious to one of ordinary skill at the time of the invention to have enabled the renting customer to access his account in order to provide updated information, for example.
